A Pocket size**B Prior scale**

RMSD < 2 Å & PB-valid (%)

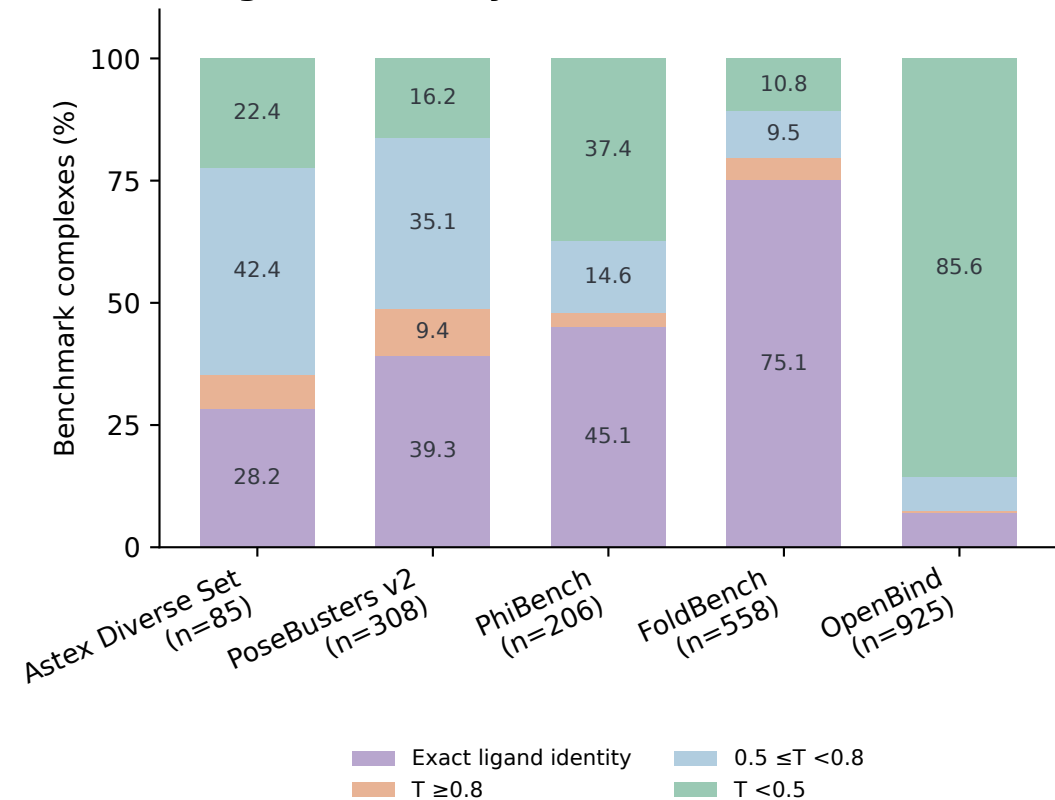

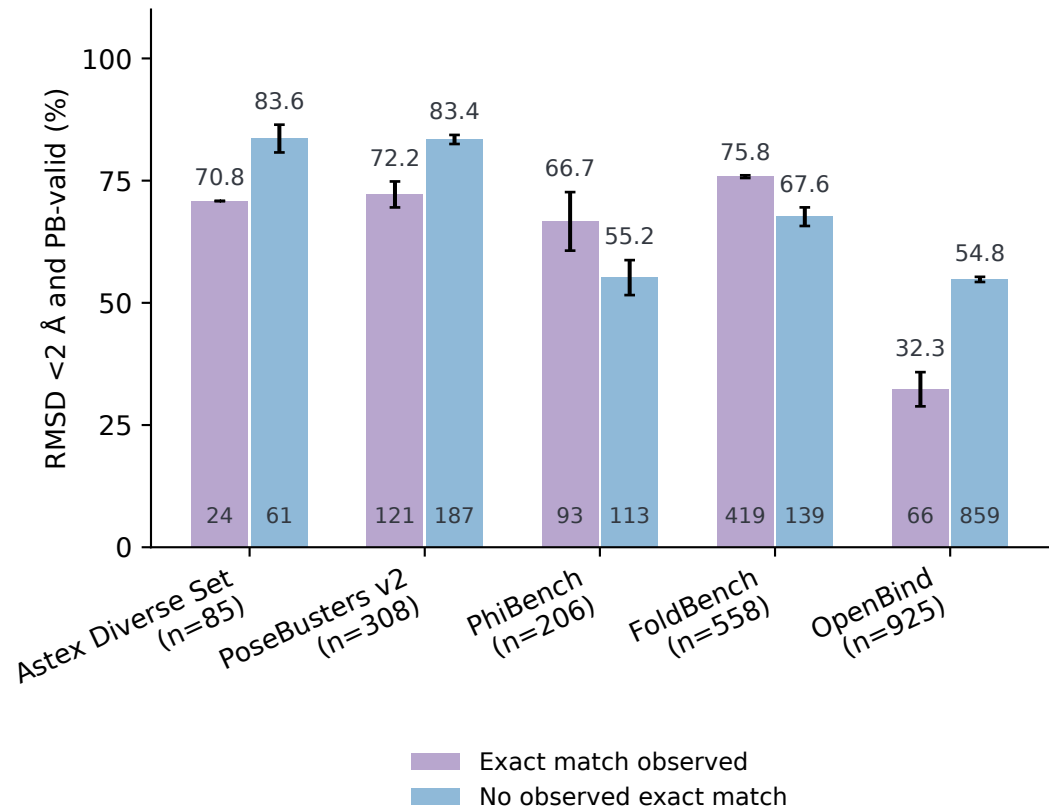

A Sequence identity**B Ligand-protein overlap****C Same training sample**

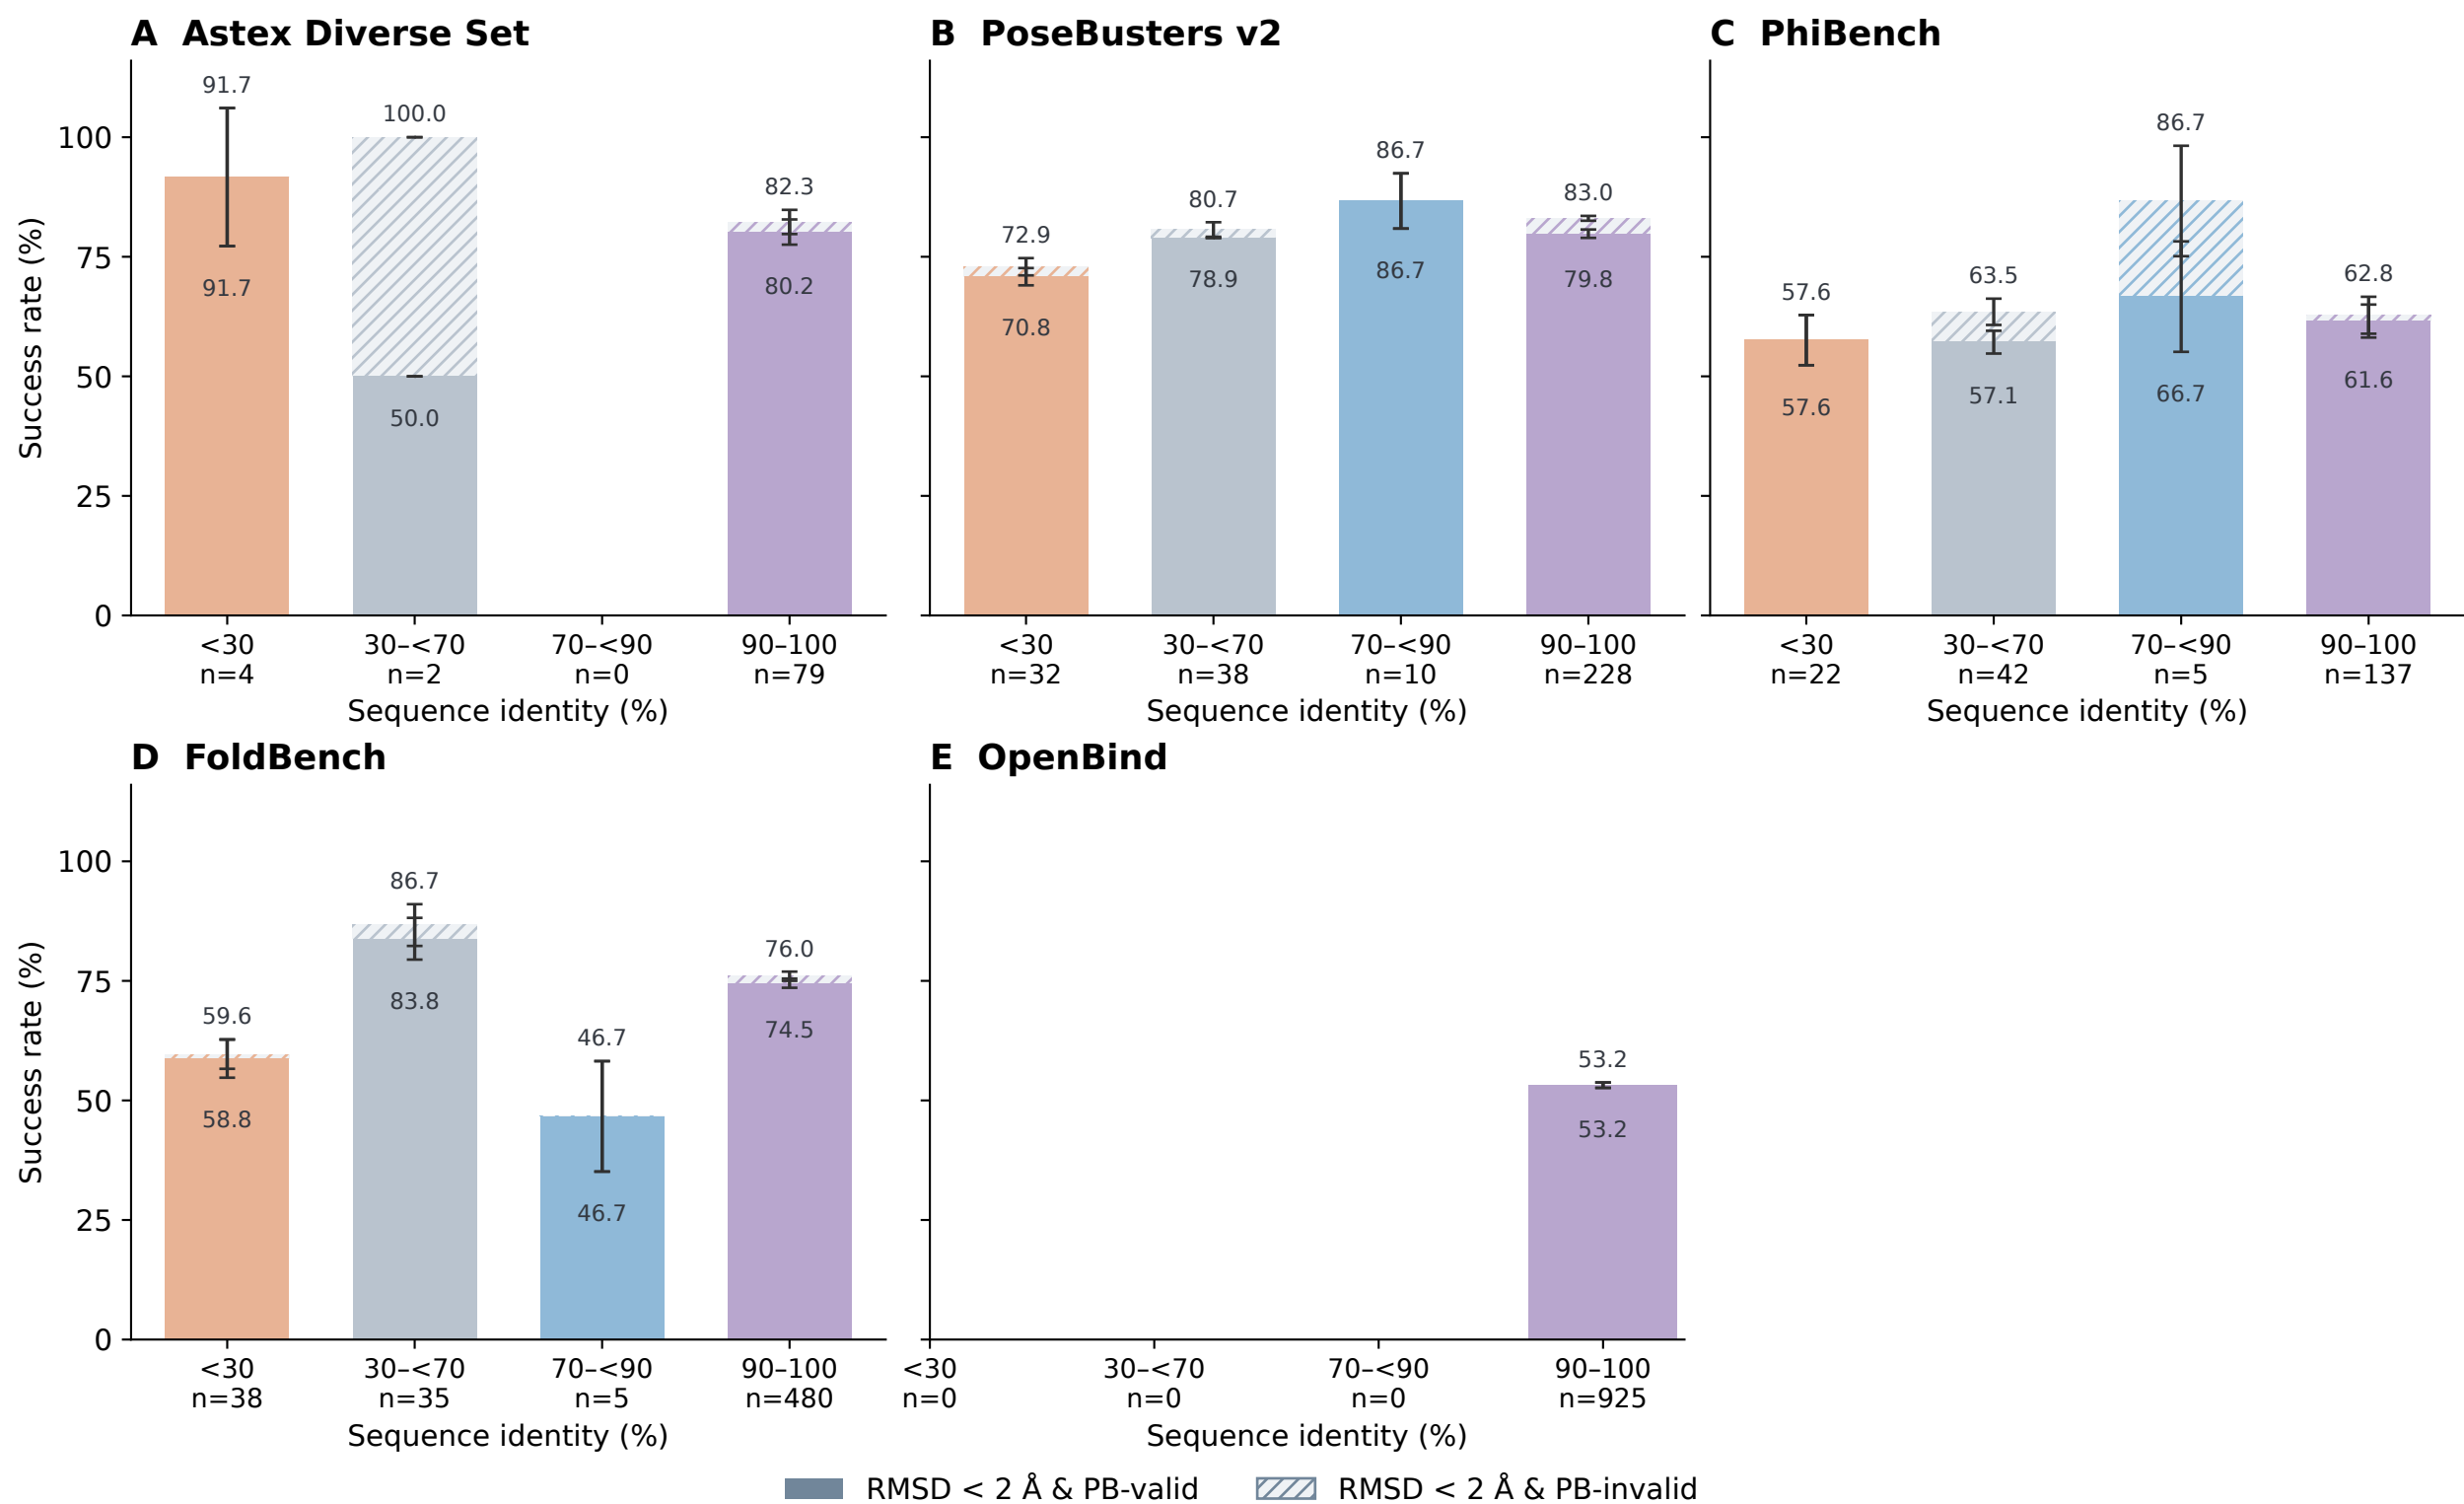

Sequence identity (%)

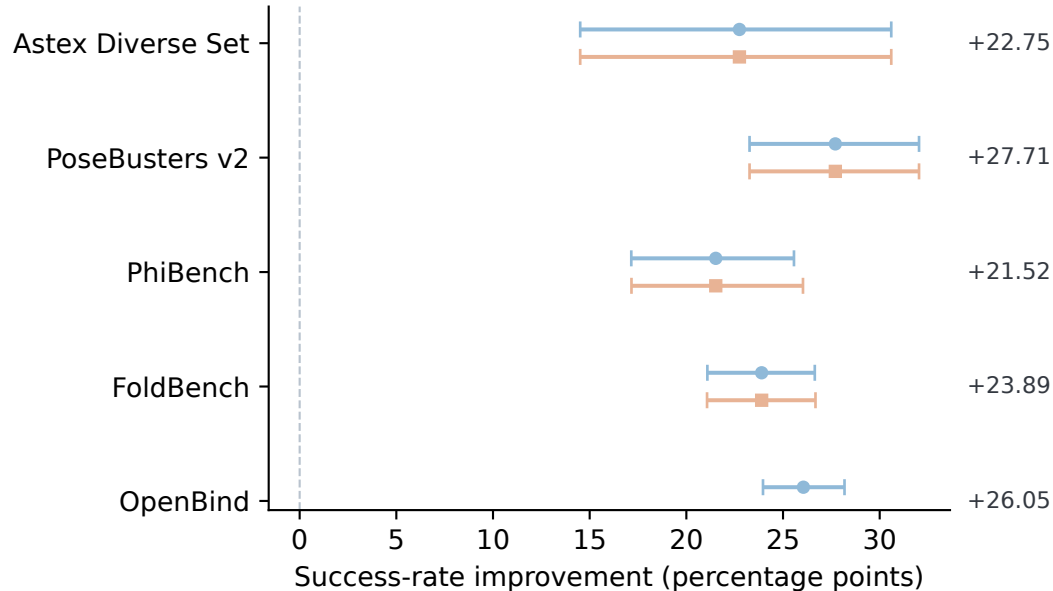

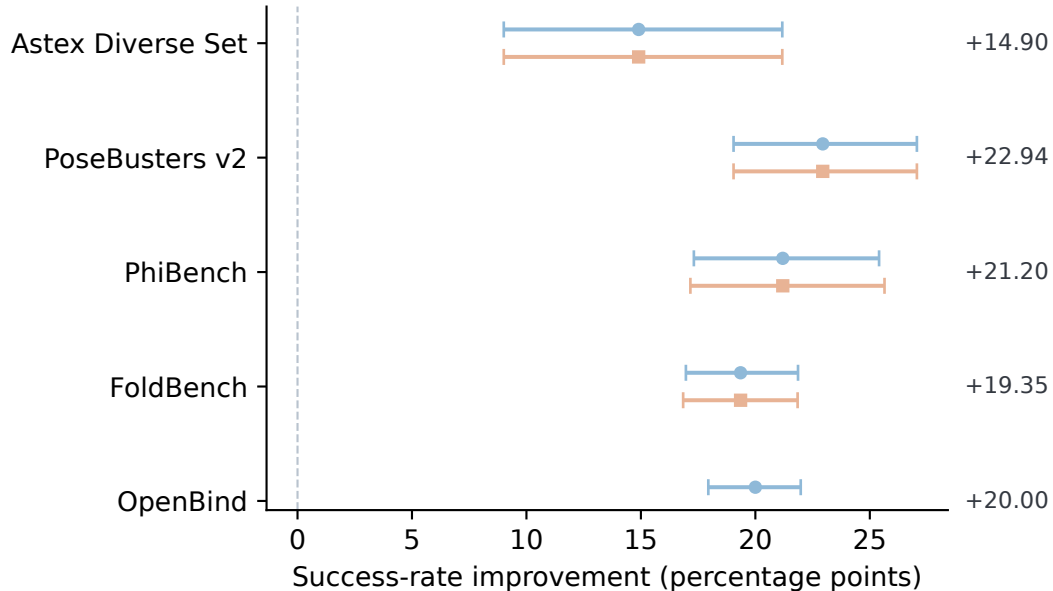

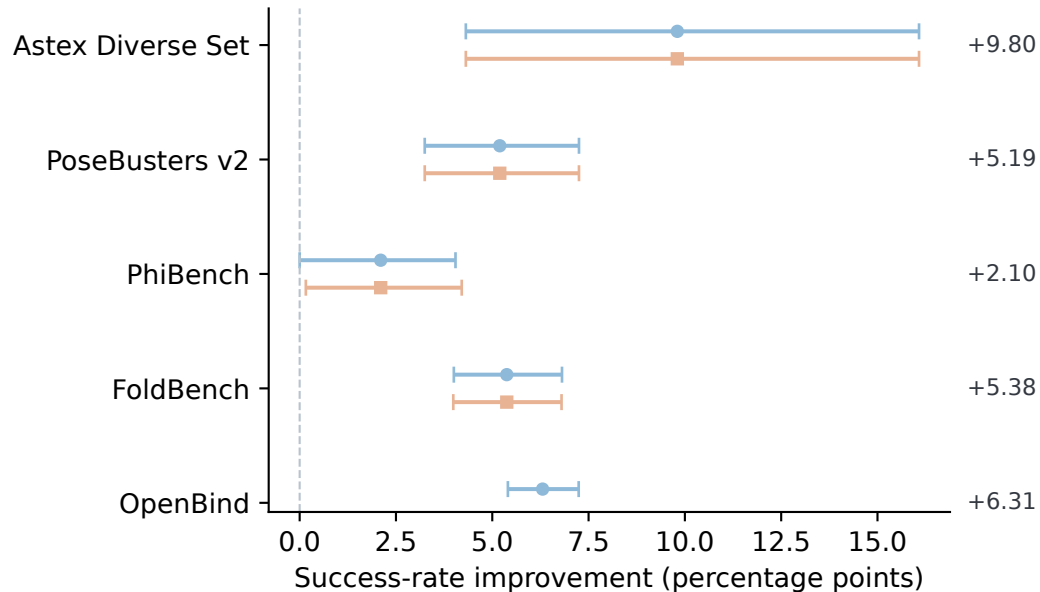

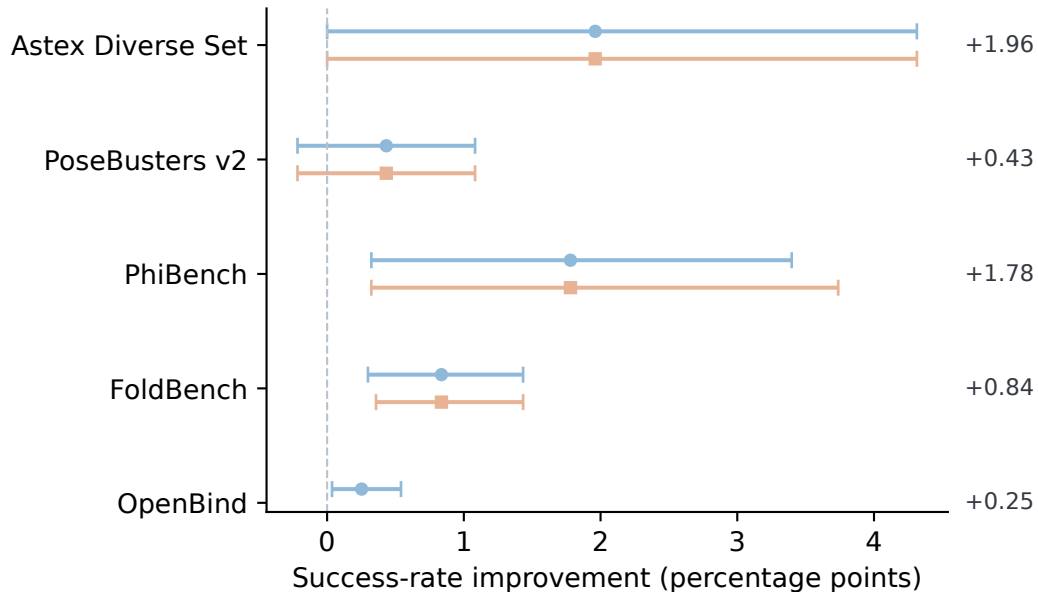

- <30%
- 30-70%
- 70-90%
- 90-100%

Ligand-protein overlap

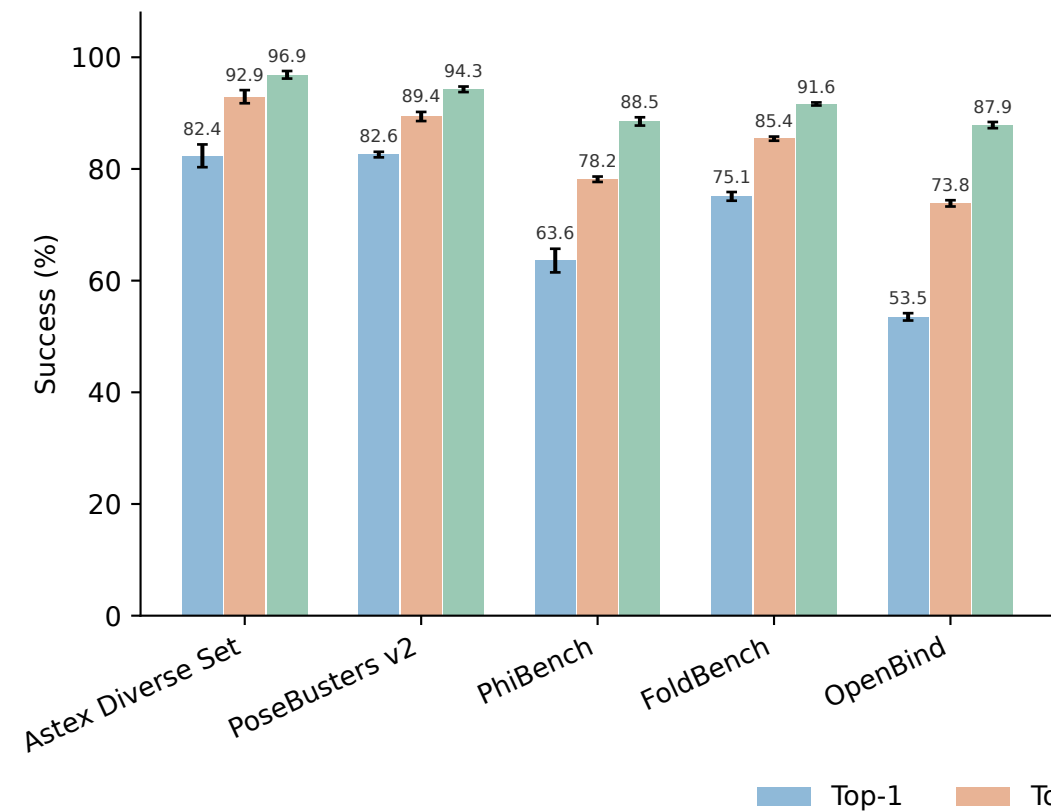

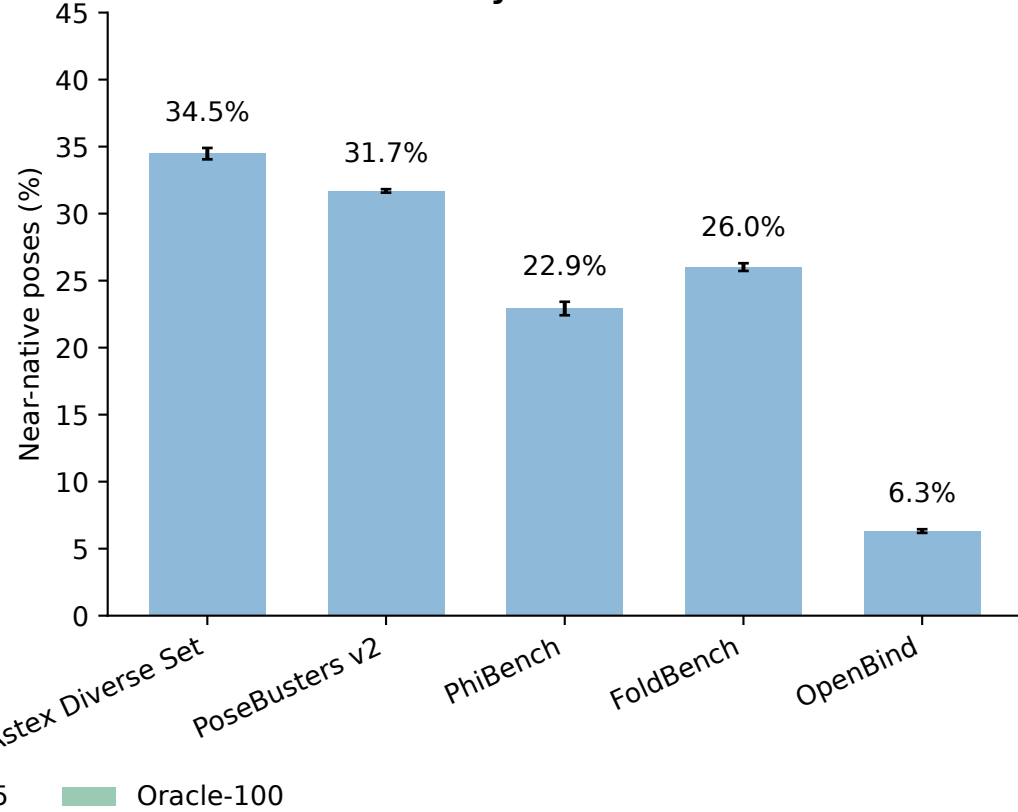

- Same-sample overlap
- Separate matches
- Ligand only
- Sequence only
- Neither observed

A Ligand similarity**B RMSD < 2 Å & PB-valid**

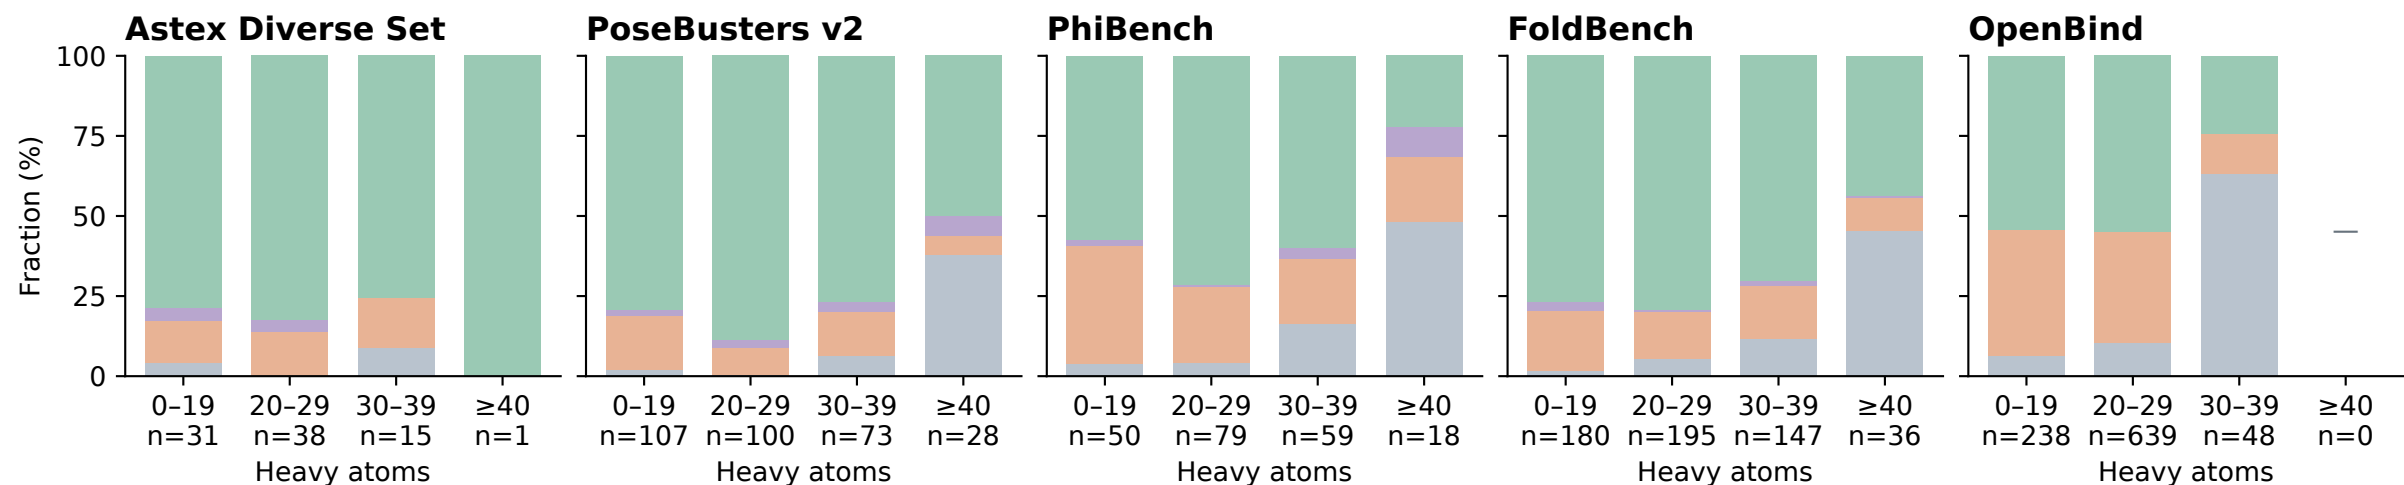

A Refined – raw, no chirality filter**B Refined – raw, with chirality filter****C Chirality filter off → on, raw****D Chirality filter off → on, refined**

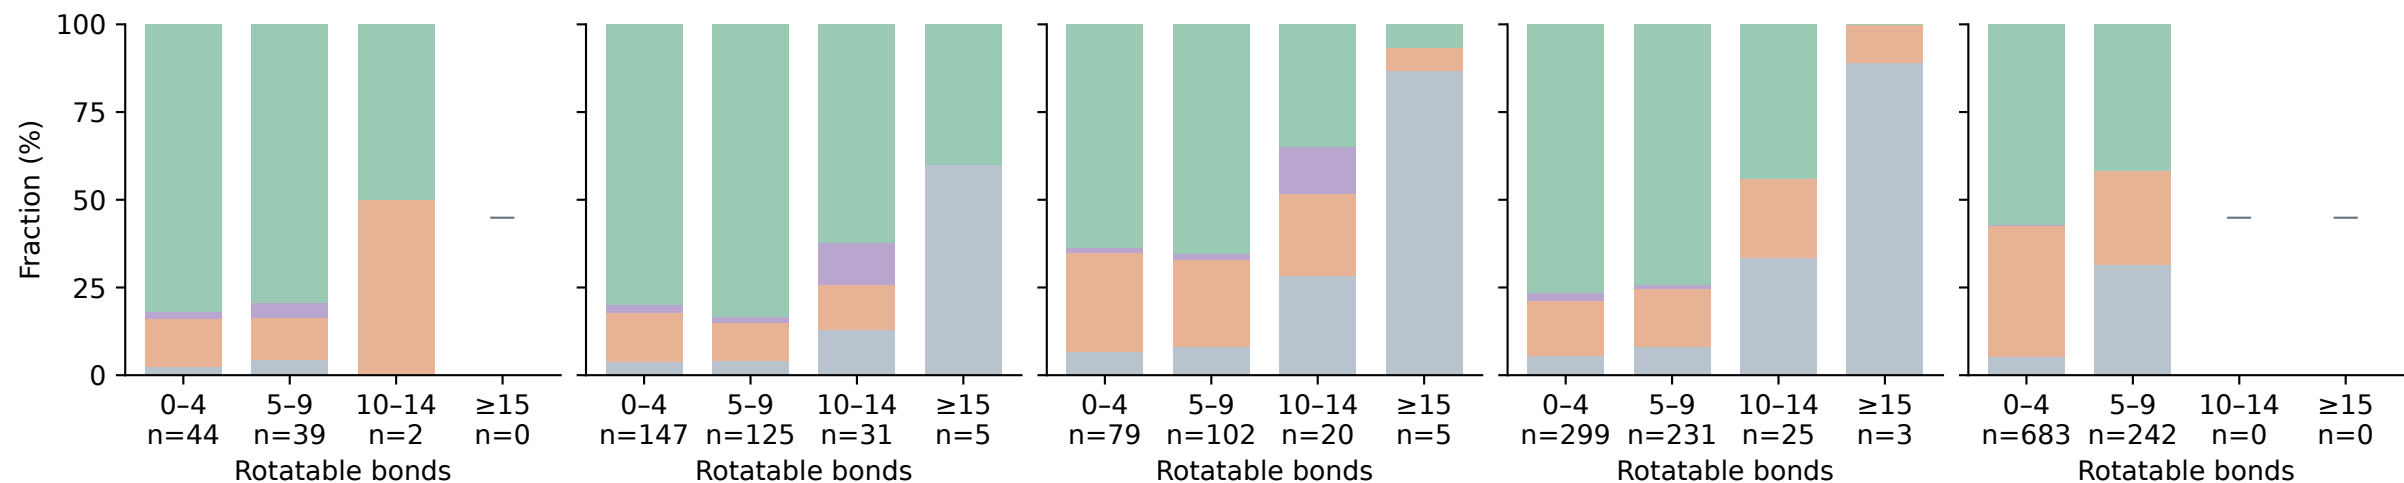

● Complex bootstrap ■ PDB-cluster bootstrap

A Selection**B Near-native density**

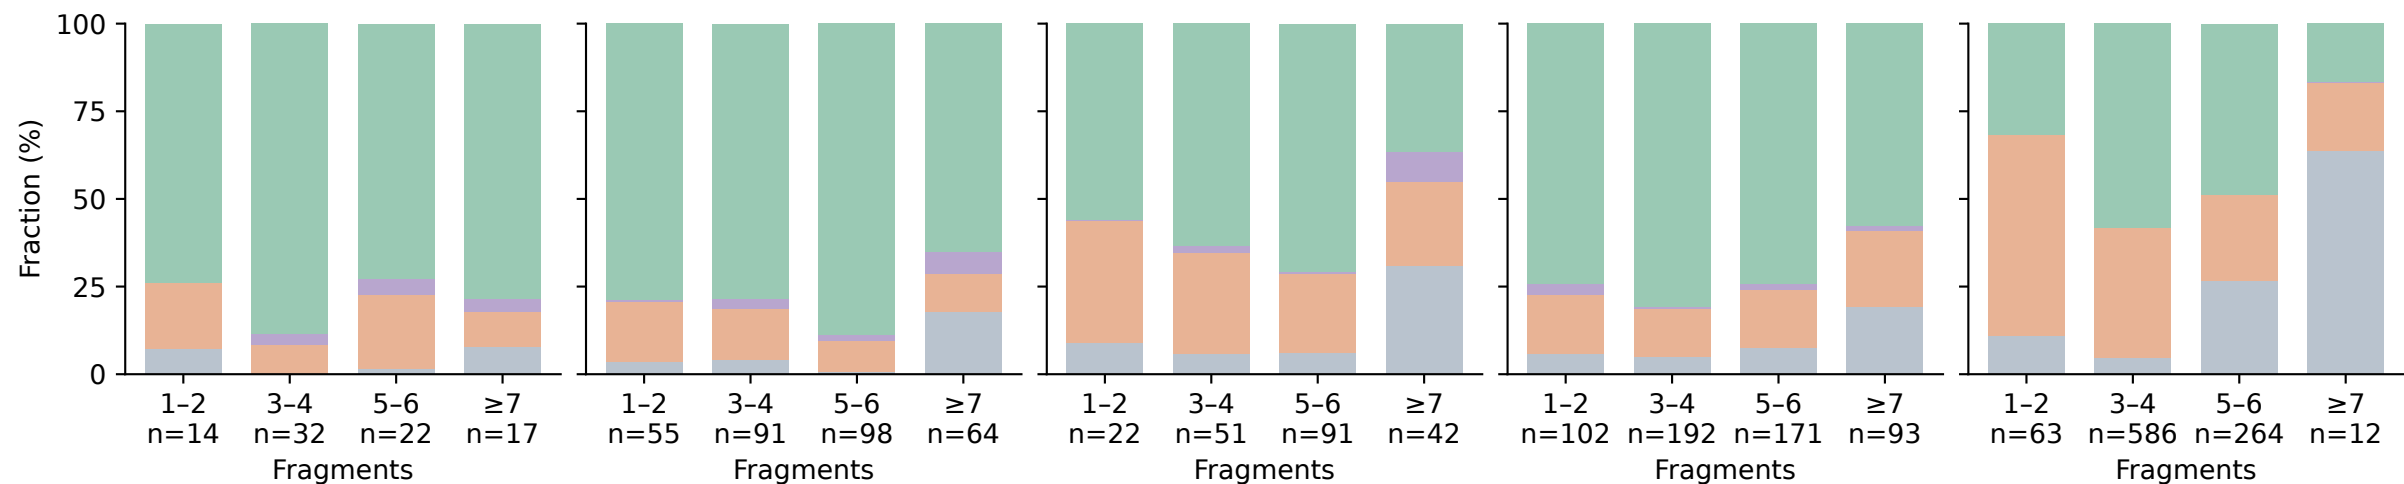

A Ligand size dependence

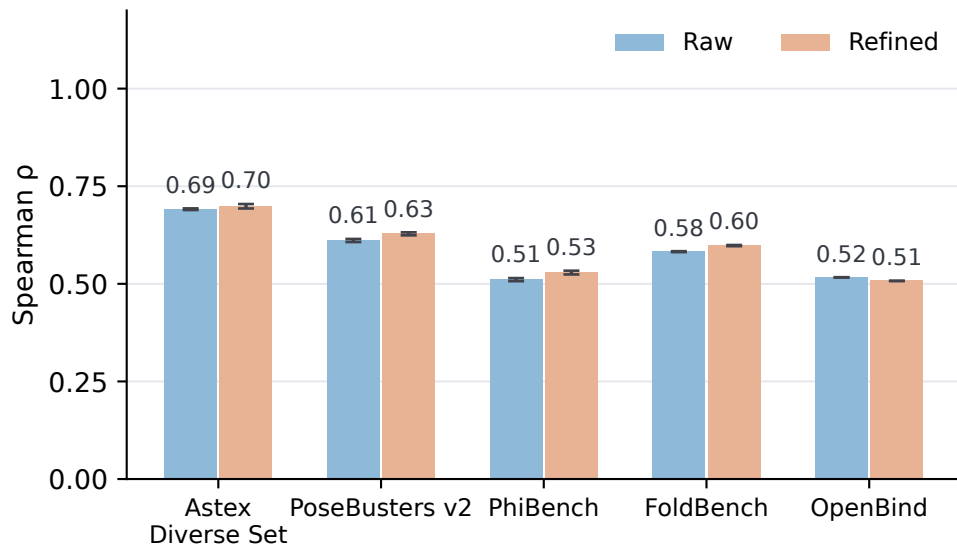

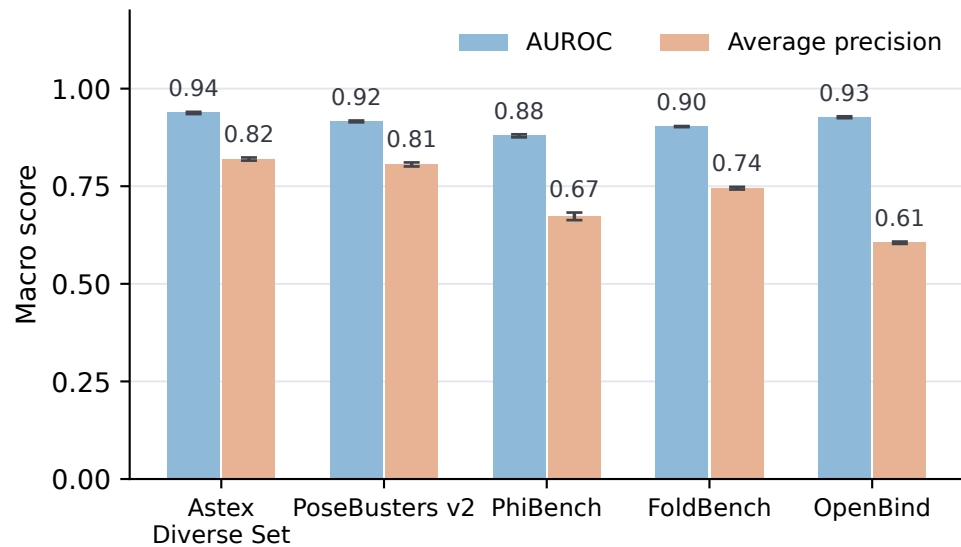

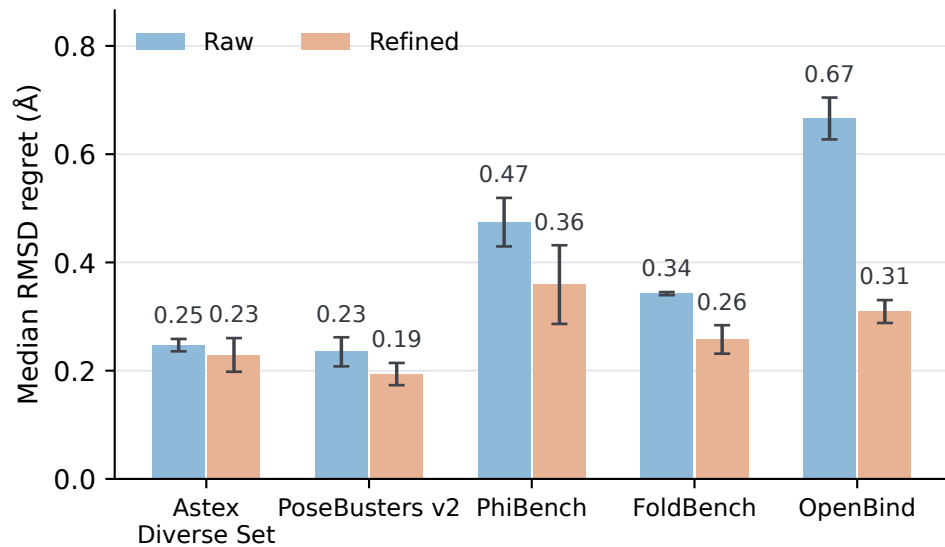

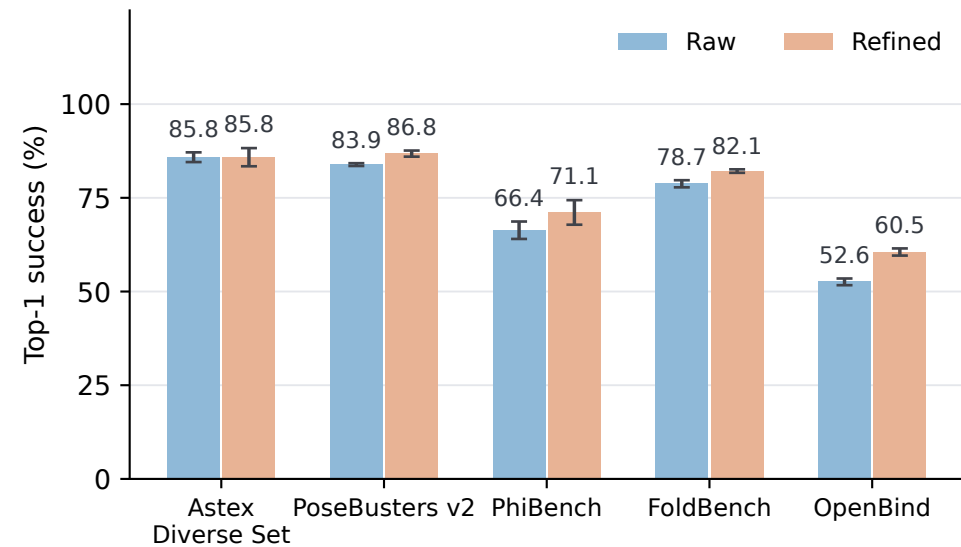

B Rotatable bond dependence

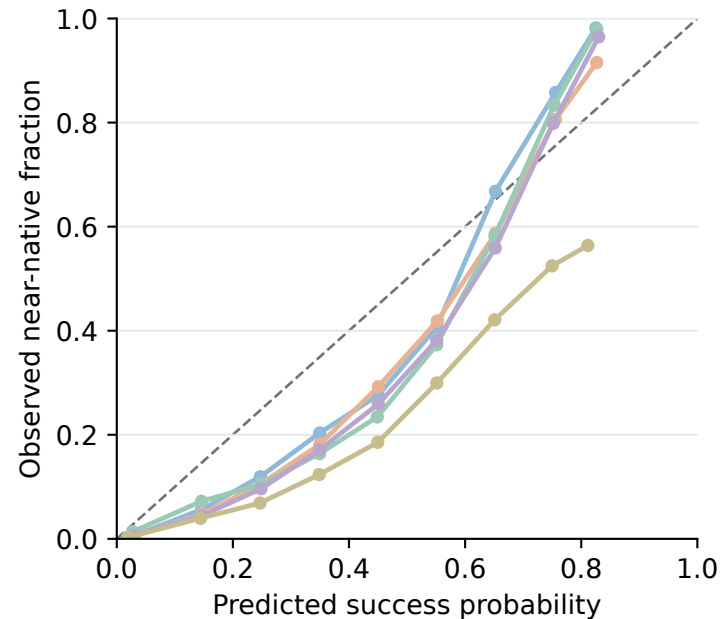

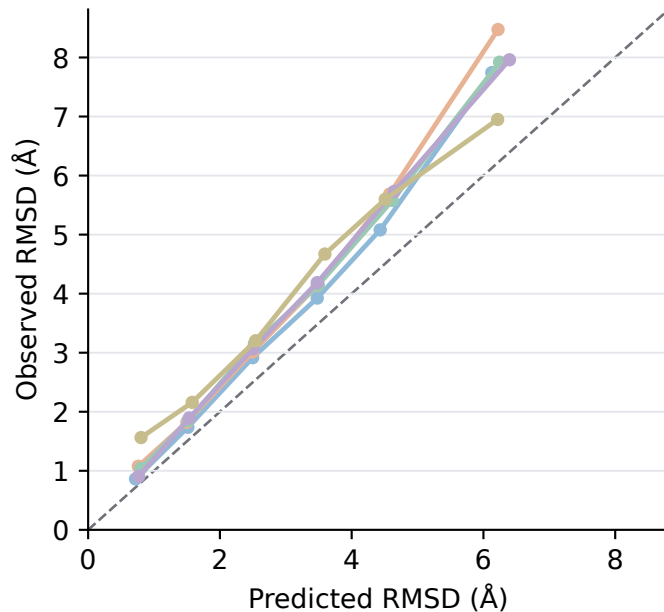

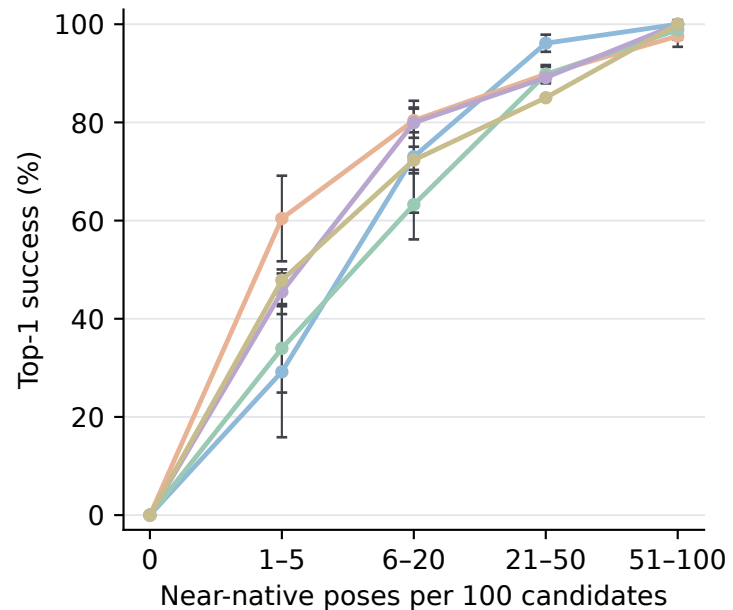

C Fragment count dependence

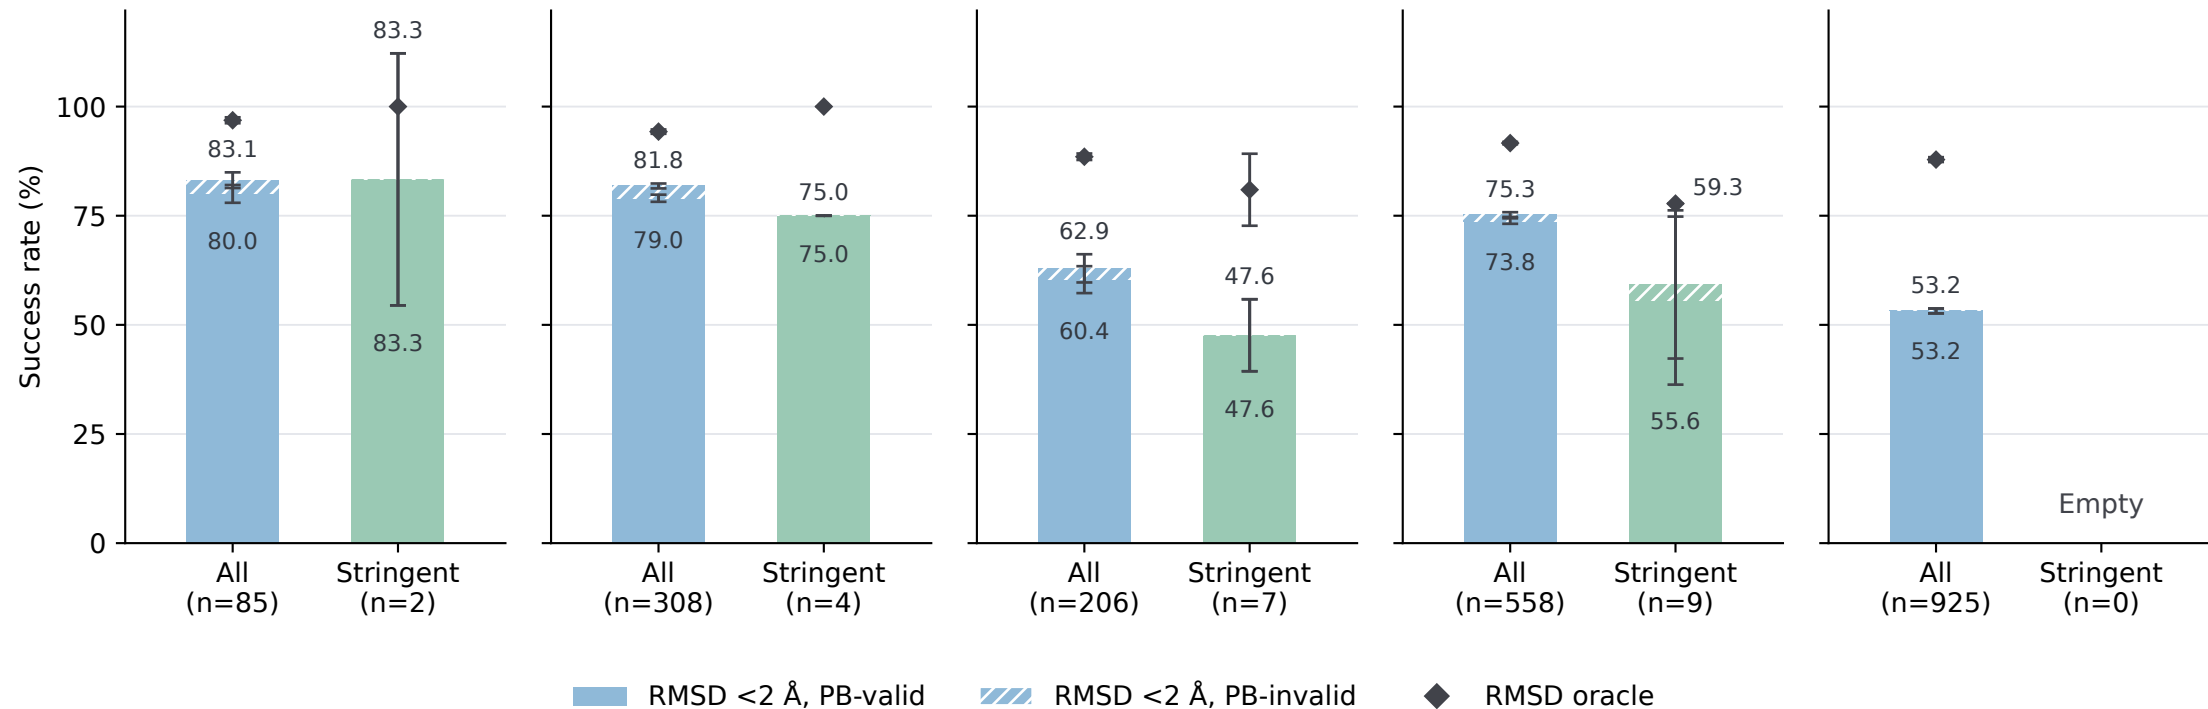

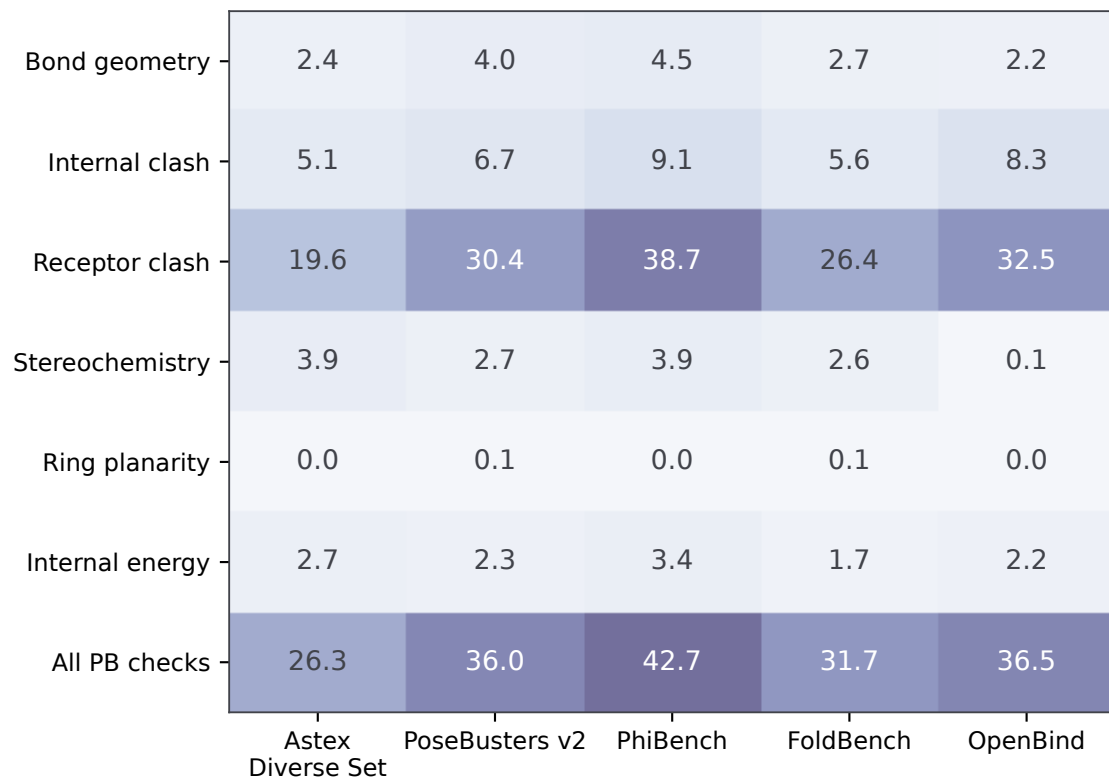

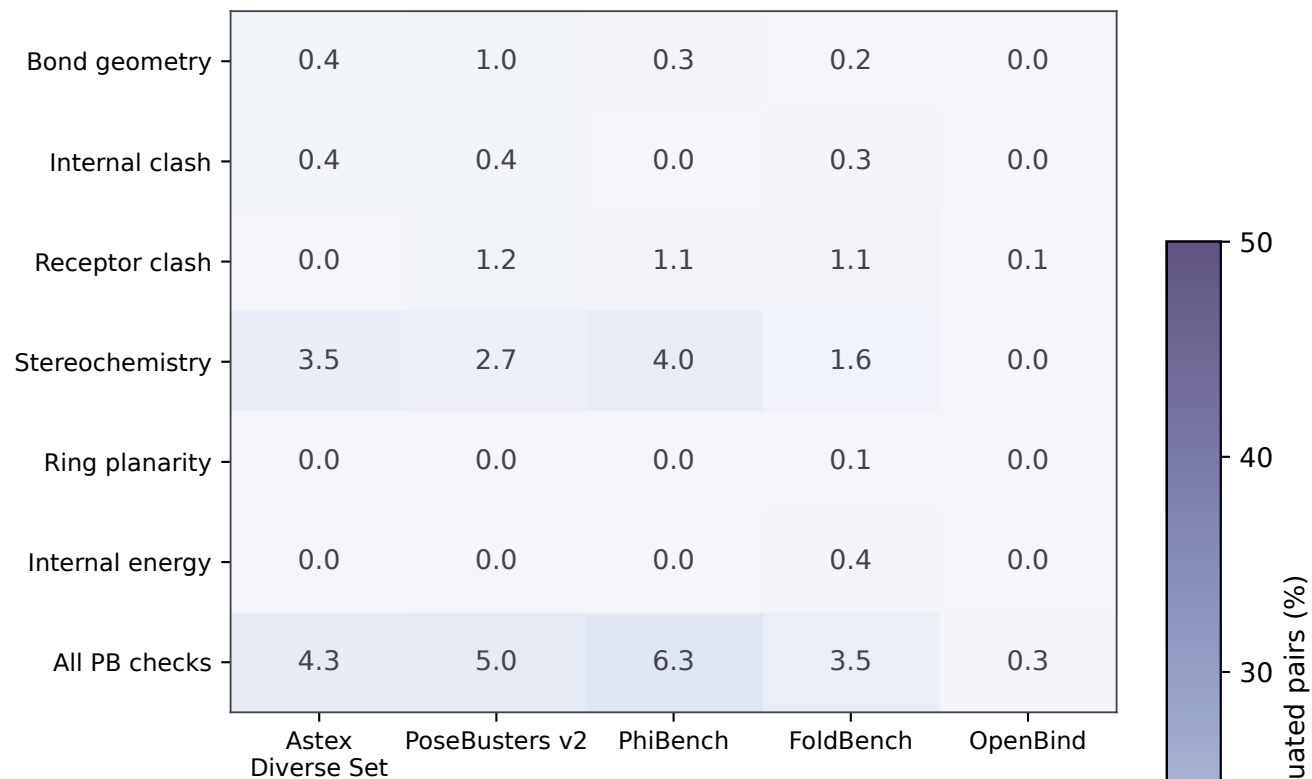

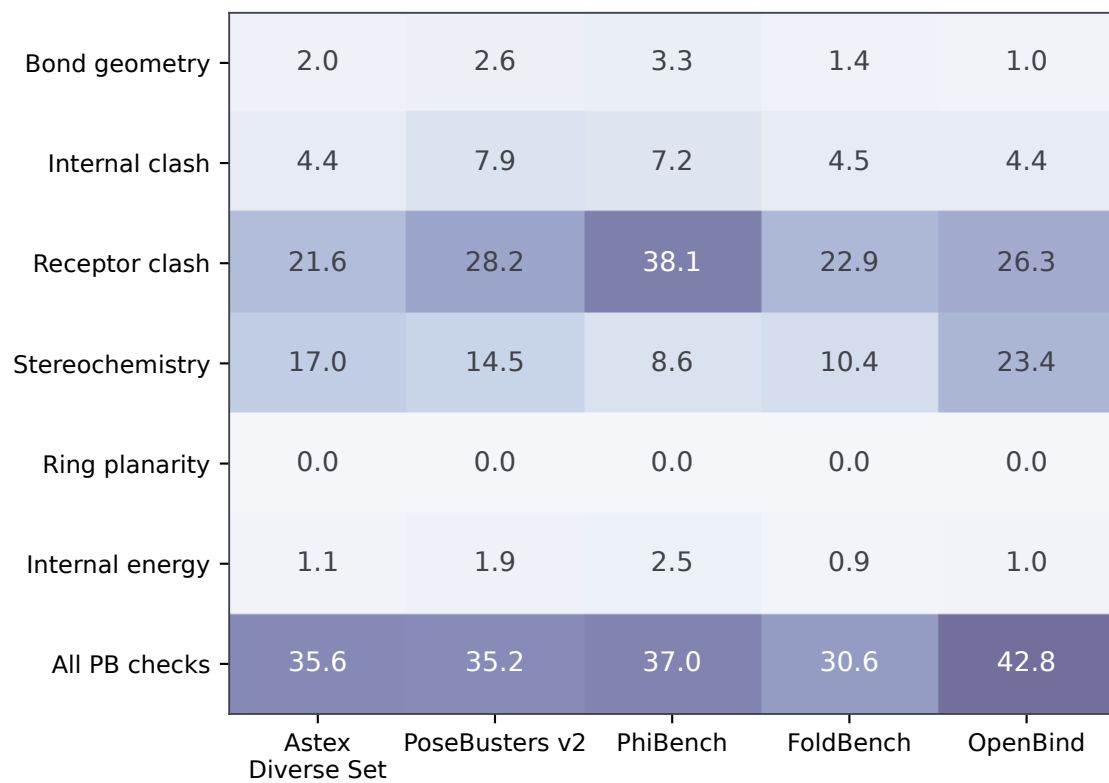

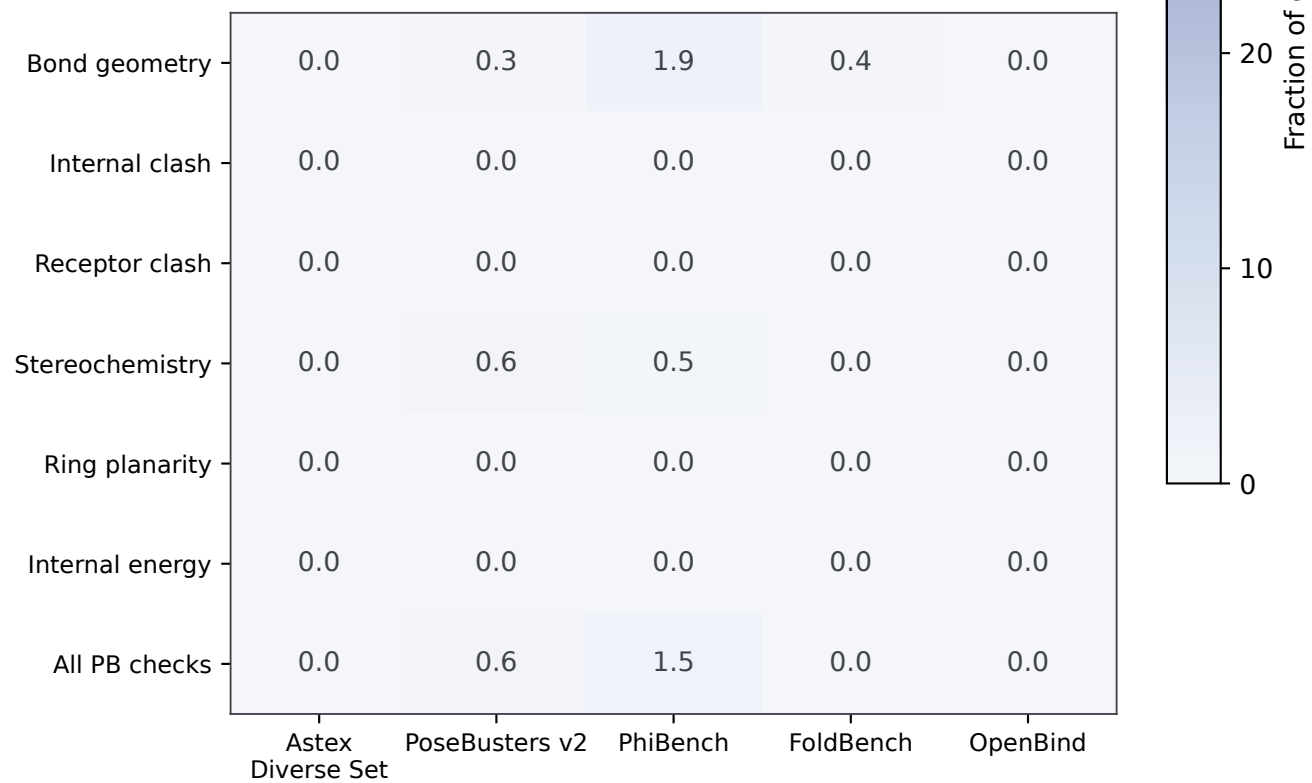

■ Near-native pose generation failure ■ Selection failure ■ PB failure ■ Success

A Within-bank ranking**B Near-native discrimination****C Selection regret****D Selection given a successful candidate**

A Success-probability reliability**B RMSD prediction reliability****C Near-native candidate density**
