

## A Model overview

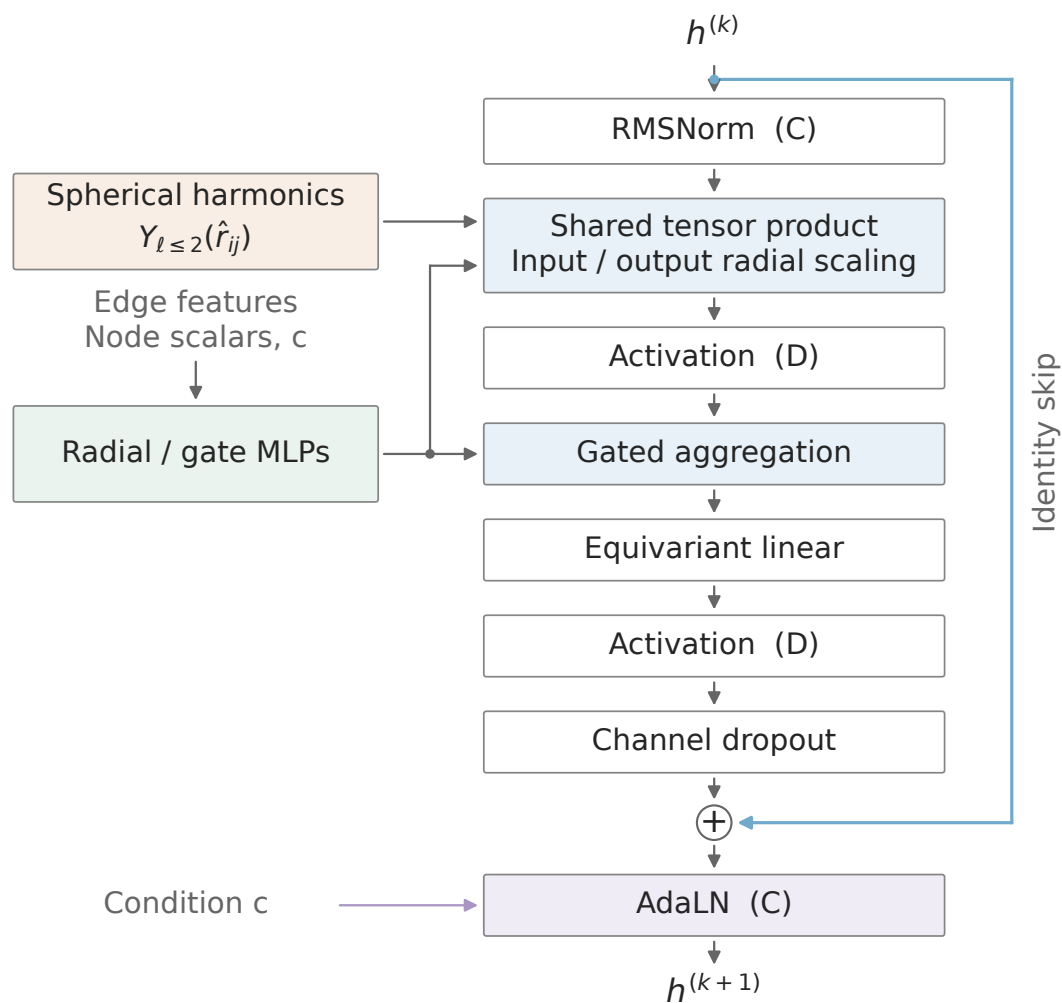

### Docking network

### Confidence network

## B Interaction layer

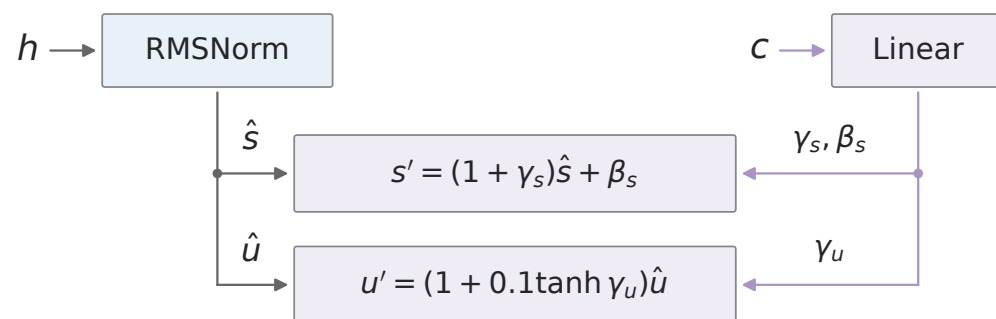

## C Equivariant RMSNorm and AdaLN

**RMSNorm** per irrep block  $b$

$$r_b = \sqrt{\frac{1}{C_b} \sum_c \|h_{b,c}\|^2 + \epsilon} \quad \hat{h}_{b,c} = a_{b,c} h_{b,c} / r_b$$

**AdaLN**

## D Equivariant activation
